

PRESS RELEASE

EcoSecurities awarded contract by China Datang Corporation to purchase 6 million CERs from Chinese wind farms

Dublin, 15th April 2008: EcoSecurities, a leading company in the business of sourcing, developing and trading carbon credits, announces that it has signed an Emission Reduction Purchase Agreement (ERPA) with the China Datang Corporation, one of five major state-owned power companies in China, to purchase over 6 million Clean Development Mechanism (CDM) Certified Emission Reductions (CERs) from 13 Chinese wind farms through to 2012.

The group of projects represents one of the largest single offerings of CERs for wind power development under the Clean Development Mechanism (CDM). The ERPA was signed at a ceremony chaired by Yin Li, Director for Strategic Planning for the China Datang Group, on Tuesday 15th April 2008. Gareth Thomas, UK Minister for Business Enterprise and Regulatory Reform, Zhai Ruoyu, President of China Datang Group, and EcoSecurities' Chief Operating Officer (COO), Adrian Fernando, also attended the signing ceremony.

The revenue generated by the sale of the CERs to EcoSecurities will make the wind farms economically viable to construct, operate and maintain and will promote the sustainability of wind farm development in China. The 13 wind farms, which Datang aims to commission between July 2008 and July 2009, are planned to contribute 618MW of installed capacity and supply an expected 1,366 GWh of renewable power on an annual basis to China's otherwise carbon-intensive electricity infrastructure.

Adrian Fernando, EcoSecurities' COO, commented, "We are delighted to have been awarded a sizeable portion of such a significant tender which represents a large addition to our growing portfolio of renewable energy projects in China."

Editor's Notes:

About EcoSecurities:

EcoSecurities is one of the world's leading companies in the business of sourcing, developing and trading carbon credits. EcoSecurities structures and guides greenhouse gas emission reduction projects through the project cycle, working with both project developers and buyers of carbon credits.

EcoSecurities has experience with projects in the areas of renewable energy, agriculture and urban waste management, industrial efficiency, and forestry. With a network of offices and representatives in over 30 countries on five continents, EcoSecurities has amassed one of the industry's largest and most diversified portfolios of carbon projects.

Utilising its highly diversified portfolio, EcoSecurities is able to structure carbon credit transactions to fit any buyers' needs, and has executed transactions with both private and public sector buyers in Europe, North America and Japan.

Working at the forefront of carbon market development, EcoSecurities has been involved in the development of many of the global carbon market's most important milestones, including developing the world's first CDM project to be registered under the Kyoto Protocol. EcoSecurities Global Consulting Services has been at the forefront of all significant policy and scientific developments in this field. EcoSecurities has been voted 'Best Advisory Firm – Kyoto Project Credits' over the last seven years by reader surveys conducted by Environmental Finance magazine.

EcoSecurities Group plc is listed on the London Stock Exchange AIM (ticker ECO). Additional information is available at www.ecosecurities.com.
