

PRESS RELEASE

EcoSecurities launches ProjectNet, a website providing voluntary buyers with the choice of carbon offsets from over 40 different emission reduction projects worldwide

Dublin, 11th November: EcoSecurities, one of the world's leading companies in the business of sourcing, developing and trading carbon credits announces the launch of ProjectNet, an extranet giving voluntary buyers who are in the process of developing and / or implementing carbon management or [carbon neutral strategies](#), access to a diverse selection of the company's global portfolio of emission reduction projects carefully selected for voluntary buyers.

[ProjectNet](#) currently contains information relating to more than 40 emission reduction projects verified to a variety of different standards including the Clean Development Mechanism (CDM), the Voluntary Carbon Standard (VCS), the Gold Standard, the Californian Climate Action Registry (CCAR) and Pre-CDM. In addition, ProjectNet offers clients practical advice on defining and implementing the right carbon management strategies. ProjectNet access is password protected and interested parties may register for access using the following link:
http://www.ecosecurities.com/Standalone/ProjectNet_Access/default.aspx

As a result of EcoSecurities' ability to develop and build long-term relationships with emission reduction projects on the ground, EcoSecurities is able to [provide voluntary buyers](#) with an array of up-to-date information through ProjectNet including:

- On site [videos](#) of the projects showcasing how the clean technology is working and other sustainable benefits that projects are delivering
- Photos documenting the process of creating emission reductions
- Detailed blog diaries from EcoSecurities' technical team conducting on site monitoring and verification checks
- Testimonials from the project owners detailing the positive impact these projects are having in the surrounding communities
- Access to the project design documents
- Third party verification by project auditors
- Easy to use search functionality to hone in on the right project for you, for example, renewable energy, verified emission reductions, in South America.

Lisa Ashford, Head of Voluntary Markets, EcoSecurities, stated, "ProjectNet provides voluntary clients with comprehensive information on a wide range of EcoSecurities projects. The platform allows clients to get close to the projects and be confident that they are purchasing real, permanent and robust emission reductions. Using this multi media approach, companies can have a much higher level of engagement with their

stakeholders ensuring they understand the environmental and social benefits that offsetting can provide”.

Editor's Notes:

About EcoSecurities:

EcoSecurities is one of the world's leading companies in the business of originating, developing and trading carbon credits. EcoSecurities structures and guides greenhouse gas emission reduction projects through the Kyoto Protocol, working with both project developers and buyers of carbon credits.

EcoSecurities works with companies in developing and industrialising countries to create carbon credits from projects that reduce emissions of greenhouse gases. EcoSecurities has experience with projects in the areas of renewable energy, agriculture and urban waste management, industrial efficiency, and forestry. With a network of offices and representatives in 36 countries on five continents, EcoSecurities has amassed one of the industry's largest and most diversified portfolios of carbon projects.

EcoSecurities also works with companies in the developed world to assist them in meeting their greenhouse gas emission compliance targets. Utilising its highly diversified carbon credit portfolio, EcoSecurities is able to structure carbon credit transactions to fit compliance buyers' needs, and has executed transactions with both private and public sector buyers in Europe, North America and Japan.

Working at the forefront of carbon market development, EcoSecurities has been involved in the development of many of the global carbon market's most important milestones, including;

- Becoming the first project developer to become a member of the World Business Council for Sustainable Development
- Development of the first CDM project registered under the Kyoto protocol, NovaGerar Landfill Project in Brazil in 2004;
- Structuring of the CDM component of the first project to receive CERs in the world, La Esperanza hydro project in Honduras in 2005.
- Received Point Carbon's award for 'Best CDM/JI Project Developer 2006' and in 2007 was voted 'Best Project Developer - Kyoto Project Credits', and 'Best Advisory Firm - Kyoto Project Credits' for the seventh year in a row in readers surveys conducted by Environmental Finance magazine.
- In 2007 the Group was ranked number 22 in CNBC European Business Magazine's 'Top 100 Low Carbon Pioneers'.
- Recognised by Environmental Data Services as one of the top 30 international carbon offset providers

EcoSecurities Group plc is listed on the London Stock Exchange AIM (ticker ECO). Additional information is available at www.EcoSecurities.com.
